

VEERA REDDY VALLELA

PROFILE

With over 8 years of experience building data-driven and AI-powered products, I specialise in turning complex, unstructured textual data into scalable, real-world solutions. My journey spans from being the 1st employee at Scoutbee — where I helped shape the foundation of a platform that raised \$76M — to co-founding 7Q1, an AI-based Supplier Search Engine built and led from scratch with a remote team of 12. Most recently, as a Data Product Owner at Matchory, I am delivering LLM-powered enrichment pipelines, RAG systems, and MCP server integrations at scale. I bring a rare combination of product thinking, hands-on Python development, and deep NLP expertise. I genuinely believe the best products come from building fast, learning from failure, and staying obsessively close to the data.

EXPERIENCE

AI/Data Product Owner, 03/2025 - Current

Matchory GmbH - Heilbronn, Germany

- Shipped scalable AI-powered data products and REST APIs that enabled enterprise clients to streamline data access and integration.
- Delivered AI solutions for entity resolution and automated data extraction, improving accuracy and speed of data processing.
- Built real-time data enrichment pipelines leveraging the latest large language models (LLMs).
- Implemented scalable orchestration workflows using Dagster for production-grade data processing.
- Developed Retrieval-Augmented Generation (RAG) systems and integrated MCP servers to enhance data retrieval capabilities.

Data Product Owner, 05/2020 - 03/2025

7Q1 — AI Based Supplier Search Engine - Stuttgart, Germany

- Conceptualised, built, and launched an AI-powered supplier discovery platform end-to-end using Python's ANVIL framework.
- Implemented NLP-based information extraction pipelines in Python for supplier intelligence.
- Led fully remote, cross-functional team of 12 engineers and data specialists to enhance collaboration and productivity.
- Established SCRUM workflows and sprint cycles on Microsoft Azure Boards to streamline project management and delivery.
- Deployed and managed thousands of AWS Lambda functions for cloud-native, serverless execution.

CITIZENSHIP

German

SKILLS

- Certified Product Owner
- Product Management
- Agile / SCRUM
- Python Development
- NLP & LLM Integration
- RAG Systems
- AWS Lambda
- Azure / Azure Boards
- Dagster Pipelines
- Elasticsearch
- Data Enrichment
- Entity Resolution
- Large-scale Web Scraping
- MCP Server Integration
- OpenAI API

Data Engineer and 1st Employee, 11/2016 - 03/2020

Scoutbee GmbH - Würzburg, Germany

- Joined as first employee, contributing to foundational aspects of company development.
- Developed core algorithms and automated processes for global supplier discovery and evaluation using Python.
- Led supplier data collection, enrichment, and quality evaluation pipelines.
- Conducted market research and competitive analysis, informing strategic product direction.
- Built and scaled a remote team of 25 and established data collaboration partnerships in India.
- Contributed to the \$76M funding journey.

Intern & Master's Thesis, 09/2015 - 09/2016

Bosch Power Tools

- Defined and built Microsoft SSIS interfaces for seamless data integration and efficient ETL workflows.
- Developed and deployed reporting front-ends that integrated effectively with enterprise data systems.
- Implemented SQL Server Reporting (SSRS) solutions to enhance business intelligence dashboard capabilities.
